Victor Taichung continues no. 2 on sales turnover in 2008

According to this year's issue of the *Common Wealth* magazine released on 6th May 2008, **Victor Taichung Machinery continues at the 2nd position for the sales turnover** among the Taiwanese machine tool manufacturers in 2008.

Started since 2006, the sales turnover in 2008 is also requested to **include all the sales of “share owned subsidiaries or group companies”** so this statistics shows the manufacturing capacity for different groups in Taiwan. For instance, Tong-Tai (Topper) has merged HONOR VTL and APEC Double Column Machining Centers so the overall sales is also increased these years and continues No. 1 because of aggressive sales and growing PCB drilling business in 2008. GOODWAY has 70% share of AWEA so the overall sales has to include the sales of AWEA. Similar calculation is also applied to FEELER who has merged LEEADWELL, ECOCA and SANCO. *A big change for the ranking is You-Ji jumps to the no. 5 (from no.9) because of increasing business sales in VTL and Quaser falls to no. 14 (from no. 8).* You-Ji should be able to jump even higher in 2009 because big VTL market is still very hot in the market.

Top 18 Machine Tool Builders in Taiwan (in 2008):

Ranking in top 1000 enterprises.			M.T. ranking	Company name	Total Sales	Capital	Employees	Main product (listed as larger % of overall sales first)
